RECAP

In May, our classroom was filled with celebrations and growth. We focused on nurturing skills such as Emotional Intelligence and Executive Functioning.

During our Mother's Day event, we focused on understanding and expressing emotions through creative activities, fostering emotional awareness and empathy in our students.

At our May birthday celebration, we incorporated Executive Functioning skills into the fun, teaching the importance of organization and time management.

As the school year concluded with our end-of-year party, we reflected on the academic and emotional growth of our students. May was a month of celebration and togetherness in our classroom.

TWINKLING RESOURCES

Breakthrough Atlanta offers tuition, free summer programming for middle school and high school students
